

REVISED INSTRUCTIONS (AS OF 03/06/24)
FOR PARKING AT COMMUNITY CHRISTIAN CHURCH

We now have a learning center for homeschooled children in the church classrooms twice a week, and we would like to keep the basketball hoop (closest to the stairs) available for their use.

Please begin parking in the corner (see attached diagram, area A) facing the shipping container up to 4 cars deep and then create one new row (or two if space allows) next to it in the same manner.

Start a new row, up to 3 cars deep, in area B next to the container but leaving enough space to open the container doors should we need to access it. Create new rows heading towards the dumpsters, but tapering down to 1 car deep leaving about 2 car lengths next to dumpsters. There should be enough room for the waste disposal service to access the bins and also for a firetruck to access the one-way driveway behind the preschool.

Once this area is full, park in area C, one car deep, facing east, starting about 2 car lengths behind the first row of cars next to the container and heading towards the entrance (area D). Area E can also be used for up to 3 cars parking parallel to preschool building, but leaving plenty of space not to congest the area leading to the one-way driveway in front and space for children playing basketball behind cars.

Please leave the parking facing west towards the church available for church staff.
